

TURBORUNNERTM

The independently powered
completion reaming system

- Re-establish hole conditions ✦
- Place completion on depth ✦
- Protect the completion ✦

TURBORUNNER™

The independently powered completion reaming system

Deep Casing Tools specializes in the design and manufacture of high quality casing and completion tools.

The **Turborunner™** is a precision engineered, completion compatible reaming tool that aids first time placement of completion or liners at target depth. Suitable for all rigs, the **Turborunner™** is independently powered and avoids the need to rotate the completion or liner, saving time, money and significantly reducing risk. Using the variable speed motor, the specially designed reamer shoe rotates at significantly higher speeds to achieve better washing and reaming performance.

Features & Benefits

- Powered reamer shoe - avoids rotating the completion
- Fluid powered - works with any rig
- Low operating flowrate - avoids formation damage
- Low operating pressure - integrates with complex completion systems
- Practical - easy to deploy
- A proven technology - more confidence and less risk to target depth

Unit 2
51 York Street
Aberdeen, AB11 5DP

THREE STEPS TO FIRST TIME COMPLETION PLACEMENT

1. Run completion with **Turborunner™**.

2. Ream & wash through obstructions.

3. Continue to target depth.
